DAIRY HERD MONITOR
Instruction Sheet

Mounting Instructions:

Drill ¼" hole into wood or masonry (top hole first) 1 ½" deep. Place nylon fastener (supplied) through top mounting hole in Monitor and into wall hole. Using bottom mounting hole as drilling guide, repeat process without removing Monitor from wall. To secure, drive screw nails into nylon fasteners until flush with head. After mounting unit to wall, drill 3/16" hole 1 ¼" deep through center eyelet. Secure with 3/16" fastener supplied. CAUTION: Avoid mounting in the direct path of excessive heat. Peel backing from pencil holder (upper right corner of unit) and attach to pencil to provide handy storage.

Operating Instructions:

Making Entries	When making entries on the Monitor always be sure the correct calendar day is positioned at the bottom center.
Calving Date	When cow calves, place blue sticker on Monitor at calving date, bottom center. Identify cow on sticker.
Heat Dates	When cow comes into heat, record date on right side of blue sticker.
Programmed for Breeding	When cow shows heat between 39 and 61 days post calving, remove blue sticker and replace with red at 61 (Programmed for Breeding). Identify her. She is then scheduled to show heat at (B.D.) Breeding Date on her breeding heat. *Option:* Her calving date may be recorded in upper left of stickers (excluding blue) to monitor calving interval.
Breeding Cow	WHEN PROGRAMMED COW (red sticker) shows heat and is bred, reposition if necessary to (B.D.) Breeding Date and record bull I.D. in upper right hand corner. WHEN NON-PROGRAMMED COW (blue sticker) is bred, remove blue sticker and replace with red at (B.D.) Breeding Date. Record bull used.
Repeat Breedings	Watch for repeat breeders at 21 days past breeding. Always reposition repeat breeding stickers at (B.D.) Breeding Date recording bull used.
Pregnant Cows	When a cow is found safe in calf, cover red sticker with green, recording service sire on right side.
Dry Cows & Dry Treat	When cow is turned dry, cover sticker with yellow again recording service sire on right upper corner. Dry Treating is recorded as D.T. on yellow sticker, lower right corner.

When ordering additional colored stickers, please specify Dairy. These are available through your dealer or by contacting Ozland Enterprises, Inc. at the numbers above.
