

AGITATION DEFOAMER™

FORMULATED TO RAPIDLY REDUCE FOAM

Agitation Defoamer is a **quick-acting** liquid that **reduces foam** during manure pump-out, helping to **increase tank capacity** and **improve pumping efficiency**. It can also be used in **foaming pits**.

DIRECTIONS

When To Use

- Reduce foaming in pits
 - During agitation and transferring of manure
-

How To Use

Shake well. Apply evenly across the entire pit, through the slatted floor or through the pump-out port.

Apply 1 gallon of Agitation Defoamer per 75,000 - 100,000 gallons of slurry.

Advantages Of Use

- Reduces risk of explosion due to methane foaming
 - Increases pit capacity
 - Easier manure handling
 - Increased tanker capacity
-

Produced From

All-natural plant based oil.

STORAGE: Store in original container in a safe, cool, and dry environment out of direct sunlight. Keep containers sealed once opened. Storage temperatures should remain under 100°F (37°C). **DO NOT LET FREEZE.**

CAUTION: Keep product away from children. Use only in agricultural applications. Avoid inhalation, skin and clothing contact. Do not ingest.
NOT FOR USE IN ANIMAL FEED.
