PHYTOZEN® LIQUID

Container format change for spring 2023

Phytozen Liquid is an Veterinary health product specifically formulated to promote positive and calm behavior in pigs, chickens and turkeys during times of stress associated with temperature changes, animal transport/handling, vaccination and feed transition. Research in pigs and poultry has shown that the supplementation of **Phytozen Liquid** in the drinking water has positive effects on the performance and well-being of animals subjected to stress (heat, density, etc.). **Phytozen Liquid** is therefore an essential and economical tool in the event of heat stress to avoid negative consequences on production and animal well-being.

OUR STRENGTHS

We believe in science and local skills as proven with all our accreditations.
