

# MS TOPFOAM

## LC ACID

MS TopFoam LC Acid is a powerful acidic foam cleaner with strong binding properties for removing heavy soiling containing iron, manganese and limescale deposits.

- Removes heavy stains
- Foam actively penetrates dirt
- Excellent adhesion to vertical surfaces
- Apply once every 6 months

Everything spotless and clean

Spray clean with cold water

Spray clean with MS TopFoam LC Acid

Disinfect with a MS MegaDes product

## Steps

1

Thorough preparation. Remove all materials and equipment (manure, drinkers, feeders, etc.) from the housing unit.

2

Coat all surfaces in the housing unit (and associated materials) with a MS TopFoam product. In cases of heavy fouling, pre-wet the surfaces.

3

Spray the housing unit (and all associated materials) clean using a high-pressure jet and then rinse with low-pressure water.

4

Every 6 months remove heavy stains containing iron, manganese and limescale deposits with **MS TopFoam LC Acid**.

5

Disinfect the housing unit with products from MS MegaDes range, to kill all remaining microorganisms.

6

Rinse the housing unit (and all associated materials) with clean water and allow it to dry.

7

A low-pathogen environment is created. The housing unit is ready for use again.
