Steps

1

Thorough preparation. Remove all loose materials and equipment (manure, drinkers, feeders, etc.) from the housing unit and flush all coarse organic matter.

2

Coat all surfaces in the housing unit (and associated materials) with products from the MS TopFoam range. In cases of heavy fouling, pre-wet the surfaces.

3

Spray the housing unit (and all associated materials) clean using a high-pressure jet and then rinse with low-pressure water.

4

Disinfect the housing unit with **MS MegaDes Oxy**

5

Rinse the housing unit (and all associated materials) with clean water and allow it to dry.

6

A low-pathogen environment is created. The housing unit is ready for use again.

Efficacy

Bacteria

• Pseudomonas Aeruginosa, • Proteus vulgaris, • staphylococcus aureus, • enterococcus hirae

Viruses

• Porcine Epidemic Diarrhea Virus (PEDv) • Classical Swine fever • African Swine Fever Virus • Porcine Respiratory and Reproductive Syndrome (PRRS) • Porcine circovirus, type II (PCV2, PT-1 cell) • Infectious bronchitis • Marek's Disease (Spafas Strain) • Avian Influenza (H5N1) • Infectious Bursal Disease (Gumboro) • Aujesky's • Bovine enterovirus type 1

Yeasts & fungi

• Candida albicans
