

CALF'S CHOICE TOTAL[®]

100 PREMIUM IgG's
GUARANTEED IN EVERY BAG

Our premium dried bovine colostrum replacer provides easy effective on-farm neonatal nutrition. This product is a spray-dried bovine colostrum that's been heat treated for safety and is free of pathogenic bacteria

CALF'S CHOICE **TOTAL**[®]

CALF'S CHOICE TOTAL®

THE MOST IMPORTANT MEAL

Effective on-farm colostrum management practices will get your calves off to the right start in life. And help make good calves into great cows. Getting enough quality colostrum might not always be as easy as milking that fresh cow. Colostrum quality varies from cow to cow. Using a refractometer to test colostrum on-farm is a useful tool to know what IgG levels you're feeding newborn calves. After all, you can't manage what you don't measure.

When quantity of maternal colostrum is lacking or quality is <22% Brix, give them a boost with Calf's Choice Total® (CCT). One bag (470g) of Calf's Choice Total® provides 100g of IgG's to calves to protect them from infectious diseases and prevents Failure of Passive Transfer (FPT). Our product may also be used to enrich clean maternal colostrum to increase the amount of IgGs provided to the calf. 15g of Calf's Choice Total® per litre of maternal colostrum will increase Brix by approximately 1%.

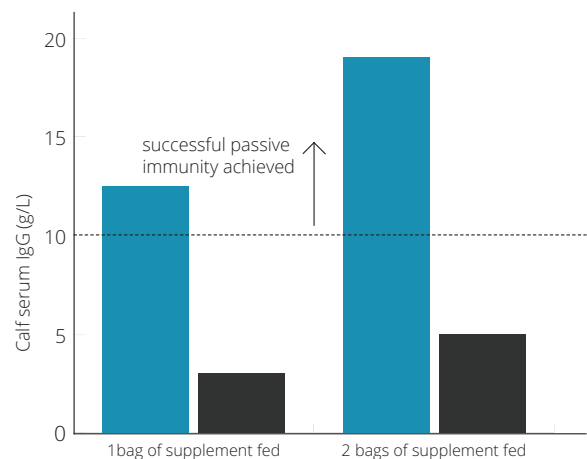

Research has shown that 100g of IgG protects calves from most common infectious diseases and increases health and productivity.

Feeding Enough Colostrum to Meet Transfer of Passive Immunity Standards

| Standard: | Fail | Fair | Good | Excellent |
|--------------------------------------|--|--|--|--|
| Calf Blood Serum IgG Content: | <10g/L | 10-17.9g/L | 18.0-24.9g/L | >25g/L |
| Dose of Colostrum Replacer: | <1 bag of CCT, OR feeding 1 bag of CCT <12 hours since birth | 1 bag of CCT within 2 hours of birth, OR 1.5 bags of CCT within 6 hours of birth | 1.5 to 2 bags of CCT within 2 to 6 hours of birth (1 to 2 meals) | ≥2 bags of CCT within 2 to 6 hours of birth (1 to 2 meals) |
| Dose of IgG from Colostrum Replacer: | >100g of IgG fed from colostrum | 100 to 150g of IgG fed from colostrum | 150 to 200g of IgG fed from colostrum | ≥200g of IgG fed from colostrum |

product highlights and recommendations

- Two size options available:
 - Single serve 470 gram pouch
 - Bulk 4.7kg pail (up to 10 feedings per pail)
- Prevents Failure of Passive Transfer
- Offers protection from infectious diseases
- Contains antibodies to E. coli, bovine rotavirus, bovine coronavirus, BVDV, BRSV, PI-3V and BHV-1
- Free of pathogenic bacteria such as E. coli, M. paratuberculosis and salmonella species
- At minimum, calves should receive one bag (470g) of Calf's Choice Total® within 2 hours of birth
